Examiner, Art Unit 3694

### **DETAILED ACTION**

1. This communication is in response to the amendment filed on December 9, 2010 for application, titled: "System and Method for Financial Instrument Pre-qualification and Offering".

### ***Status of the Claims***

2. Claims 1, 12, 14, and 31 have been amended. No claims have been cancelled or added. Accordingly, claims 1-31 are pending in this application and have been examined.

### ***Allowable Subject Matter***

3. Claims 1-31 are pending. All pending claims are allowed.

4. The following is an examiner's statement of reasons for allowance:

5. The closest reference of Vasic (U.S. Patent Application Publication No. 2001/0034676) fails to teach or render obvious *"receiving from a database information related to personal identification information associated with a consumer who is a customer of at least one of a financial institution and an entity associated with the financial institution, the consumer personal identification information being received prior to a consumer contact; a programmable processor inquiring a third party based on the received information related to the consumer personal identification information whether the consumer has been pre-qualified for a financial instrument, the financial instrument associated with the financial institution, wherein the pre-qualification is based*

Art Unit: 3694

*at least in part on a first consumer file; receiving pre-qualification data from the third party wherein the pre-qualification data relates to a determination of whether a consumer identifier associated with the consumer is contained in a suppression database, wherein the suppression database comprises a plurality of second consumer files, each of the second consumer files linked to a unique consumer identifier, wherein the second consumer files comprise suppression information relating to a determination that the consumer associated with the second consumer file is no longer qualified to be offered one or more of the pre-qualified financial instruments stored in the first consumer file; the programmable processor requesting data periodically for requalification of the consumer prior to a consumer contact to reduce a likelihood of offering a financial instrument for which a consumer is no longer qualified; and the programmable processor offering the consumer the financial instrument for which he or she is pre-qualified, if the received pre-qualification data from the third party indicates that the consumer is pre-qualified for a financial instrument, wherein standards for the consumer pre-qualification are set by the financial institution”.*

6. The Examiner has performed an update search and did not identify any reference(s) that disclose the claimed invention, or could be reasonable to combine with the Vasic reference. Thus, the cited prior art fails to teach or render obvious the method and system for financial instrument pre-qualification and offering. For this reason, independent claims 1, 12, 14, and 31 and dependent claims 2-11, 13, 15-30 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Pertinent prior art: "Credit Scoring Models Should Be Revised For Internet Card Offers", date April 5, 2000, vol. 15, issue: 7, Publisher: Phillips Business Information.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
